

SIEBTECHNIK TEMA

Back to the Future of Screening

The Multiple-Deck-Sizer MDS

The Multiple-Deck-Sizer MDS

SIEBTECHNIK TEMA revives a proven concept.

Building on a proven operating principle, the design has been revised to achieve greater separation accuracy, shorter maintenance cycles and energy-efficient vibration characteristics.

The **Multiple-Deck-Sizer MDS** combines precise thin-layer classification with robust components, short maintenance times and a compact machine design.

The aim is to rethink conventional screening technology – with greater precision, a modular design and optimized energy efficiency.

Benefits at a glance:

- ◆ Precise separation through a thin material layer
- ◆ Modular deck configuration with up to six screen decks
- ◆ Maintenance-friendly design with short changeover times
- ◆ Energy-efficient vibration mechanism with high throughput
- ◆ Compact footprint for integration into existing plants
- ◆ FEM-optimized structure for high operational reliability and long service life
- ◆ Suitable for virtually every industry
